Thermodynamic Steam Trap BTD52L

The BTD52L
Thermodynamic Steam
Trap is constructed
entirely of 316L stainless steel and is suitable for aggressive
condensate often found
in clean steam systems
using deionized water.
Condensate and air are
discharged at saturated
steam temperature without the need for a water
seal.

Model	BTD52L			
РМО	150 psig			
Sizes	1/4", 3/8" & 1/2"			
Connections	NPT, 0.065" O.D. Tube (1/2" only) Tri-Clamp®* compatible (1/2" only)			
Construction	316L Stainless Steel			
Options	BSP connections Insulcap			

A registered trademark of Tri-Clover Inc.

Limiting Operating Conditions

Max. Operating Pressure (PMO) 150psig (10 barg)

Minimum pressure for satisfactory operation is 3.5 psi (0.24 bar) Maximum back pressure should not exceed 80% of the inlet pressure under any conditions of operation, otherwise the trap may not shut.

Max. Operating Temperature $850^{\circ}F(454^{\circ}C)$

at all operating pressures

Pressure Shell Design Conditions

PMA 230 psig/0-850°F 16 barg/0-454°C

Max. allowable pressure

™A 850°F/0-230 psig 454°C/0-16 barg

Max. allowable temperature

Standards

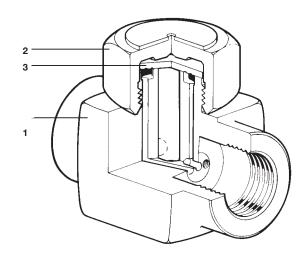

These products fully comply with the requirements of the European Equipment Directive 2014/68/EU

Capacities					
Pressure (psig)	1/2" sanitary clamp, 1/2" OD tube end, 1/4" NPT Flow (lb/h)	3/8",1/2" NPT Flow (lb/h)			
5	71	167			
10	89	185			
15	101	196			
20	111	204			
25	120	210			
50	150	270			
75	171	331			
100	188	393			
125	203	454			
150	215	515			

All flows shown are differential flows

Typical Applications

In the biotechnology, pharmaceutical, fine chemical, food, dairy and beverage industries: main drip service, WFI system sterilization, and drainage of steam filter housing and separators.

Construction Materials

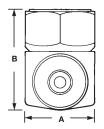

No.	Part	Material	
1	Body	Stainless Steel	AISI 316L
2	Сар	Stainless Steel	AISI 316L
3	Disc	Stainless Steel	AISI 316L
	Insulcap (optional)	Aluminum	

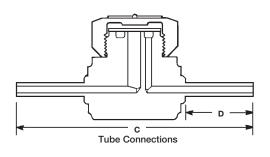

Material Certification

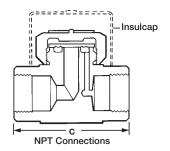

Actual mill test reports covering the O.D. tube and Tri-Clamp® body and cap material are available if specified at the time of ordering.

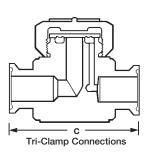

Thermodynamic Steam Trap BTD52L

Dimensions (nominal) in inches and millimeters									
Size	Α	В	C Tube	C Screwed	C Tri-Clamp	D Tube	Weight Tube	Weight Screwed	Weight Tri-Clamp
1/4"	1.4 36	2.1 53	-	2.6 65		-	-	1 lb .45 kg	-
3/8"	1.4 36	2.1 53	-	2.6 65	- -	<u>-</u> -	<u>-</u> -	1 lb .45 kg	<u>-</u> -
1/2"	1.4 36	2.1 53	4.8 123	2.6 65	2.6 65	4.8 123	1 lb .45 kg	1 lb .45 kg	1.2 lb .55 kg

Options

Insulcap - The insulcap is a friction-fit cover designed to reduce the effect of excessive heat loss resulting from low ambient temperatures, wind, rain, etc. Available as a spare

Sample Specification

Steam trap shall be all ANSI 316L stainless steel thermodynamic disc type with connections on a common center line which can be installed in any position. Integral seat design. Shall not require any water seal for normal operation. Spirax Sarco type BTD52L for all pressures between 3.5 psig (0.24 barg), and 150 psig (10 barg).

Installation

Preferably install in a horizontal line as close as possible to equipment or pipeline being drained. For freeze proof or self-draining installations, or where horizontal fitting is not possible, the BTD52L may be installed vertically. Full-flow isolating valves should be installed upstream and downstream of the trap.

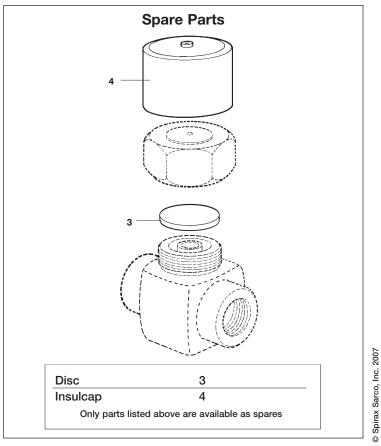

Maintenance

This product can be maintained without disturbing the piping connections. Complete isolation of the trap from both supply and return line is required before any servicing is performed.

The trap should be disassembled periodically for inspection and cleaning of the disc and seat.

The only wearing parts of the trap are the disc and seat rings, which should be inspected and cleaned periodically. Slight wear can often be corrected by resurfacing on a lapping plate.

Complete installation and maintenance instructions are given in the IMI sheet, which accompanies the product.
