## CRANE ChemPharma & Energy

September 3<sup>rd</sup>, 2025

To: Our Valued CRANE NAVG Customers  
Subject: CRANE NAVG Price Adjustment

At Crane, we remain committed to delivering the highest quality products and dependable service to support your business. Over the past year, we have navigated significant challenges together, including multiple tariff-driven adjustments earlier this year. While those changes were necessary to address external trade impacts, the upcoming adjustments are necessitated by the ongoing inflation in material, labor, freight, and operational costs to procure and manufacture our products without compromise and continue to deliver the service and quality you expect from us.

Therefore, effective September 17<sup>th</sup>, Crane will implement new price lists to reflect a price adjustment for our NAVG brands, including Crane® Cast Steel, Crane® Bronze, Crane® Cast Iron, Crane® Ball, Crane® Forged, Stockham®, Aloyco®, Centerline®, Flowseal®, and DuoChek®.

This price adjustment is variable within product families, and across brands. The price list updates include an average increase of 5.8%.

Existing valid quotations and orders will be honored with the quoted prices. All orders received prior to the increase must be scheduled for immediate release and should not exceed one-month's typical historical usage.

We understand that price increases can be challenging news. We assure you that your business is very important to us, and we would like to take this opportunity to reaffirm our commitment to you and your customers.

Thank you for your understanding and please do not hesitate to contact your Crane Sales Representative with any questions about the adjustment.

Sincerely,

*Koustubh Kulkarni*

Vice President & General Manager  
Engineered Check, NAVG, and Pacific Valves
