CRANE ChemPharma & Energy

Date: October 1st, 2026

To: Our Valued CRANE NAVG Customers
Subject: Annual NAVG Price Adjustment

At Crane ChemPharma & Energy, we remain committed to providing the quality, dependable service, and supply support you expect from us. We also believe in communicating openly when rising costs require a change to our pricing.

Inflation and increases in commodity, labor, freight, energy, and other operating costs continue to affect the cost of procuring, manufacturing, and delivering our products. We have worked to manage these pressures, but can no longer absorb their full impact while maintaining the standards of quality and service our customers rely on.

Accordingly, effective **November 1st, 2026**, Crane will implement its annual price adjustment across the following NAVG brands, including Crane® Cast Steel, Crane® Bronze, Crane® Cast Iron, Crane® Ball, Crane® Forged, Stockham®, Aloyco®, Center Line®, Flowseal®, and DuoChek®.

Updated price lists will reflect the applicable pricing. Existing valid quotations and accepted orders will be honored at their quoted prices.

We recognize the impact a price increase can have on your business and value the partnership we share. If you have questions about the adjustment or a specific order or project, please contact your Crane Sales Representative.

Thank you for your understanding and continued support.

Sincerely,

Koustubh Kulkarni

Vice President & General Manager
Engineered Check, NAVG, and Pacific Valves
