January 9, 2026

Dear Valued Partner,

The intent of this letter is to inform you of a price increase effective on February 16, 2026. The increase will be 4% for all products.

ThermOmegaTech has made every effort to manage costs in a manner that allows us to add value by making our products as affordable as possible. Unfortunately, increasing costs – including raw material, supply chain and labor rates – made this update unavoidable.

The goal is to only have one price increase in 2026. Last year's issuance of two increases was unprecedented and reflected a high level of uncertainty in the marketplace. The expectation is that it was an exception and not the rule. Barring something unforeseen, the 4% increase on February 16th will cover the cost increases forecasted over the course of the year.

Orders placed prior to the price increase must ship within standard lead times. Any orders placed after February 16th will incorporate the new pricing.

Thank you for your continued support of ThermOmegaTech. We appreciate the partnerships that drive our business – and look forward to working with you to help our customers improve process efficiencies through temperature control. Please let our Industrial team know how we can help solve problems.

Regards,

A handwritten signature in black ink, appearing to read 'Andrew Reichlin', is placed above the printed name.
