Subject: Distribution List Price Adjustments, Effective August 18, 2025

Dear Customer:

As you are well aware, the actions being taken by the U.S. Federal Government with respect to its Trade Policy continue to evolve rapidly and cause significant impacts around the world. While we had hoped our price increase in May would allow us to maintain pricing levels for the foreseeable future, unfortunately, continued tariff pressure is causing us to raise prices again in order to offset the resulting additional costs to our business.

As we also mentioned in May, Viega continues to work diligently to localize critical manufacturing and supply chains while controlling costs and optimizing our processes to best serve you, our customers, including the recent commissioning of our brand new Mantua, Ohio manufacturing facility. Despite these efforts, there are still several products that we sell in the U.S. that are directly impacted by the doubling of existing steel tariffs made effective by the White House as of June 4, 2025.

Accordingly, effective August 18, 2025, Viega will adjust prices on certain MegaPress® and ProPress® stainless steel products as a direct result of the increased input costs caused by the U.S. Trade Policy. Below you will see the specific products and associated price increases; for the most up-to-date pricing information, visit www.viega.us or contact our Customer Service Team at 1-800-976-9819 or via email at customerservice@viega.us.

We understand the continued impact this will have on your business and customers, but hope the additional time period provided in this notice will allow you to lessen that impact. That said, while we hope to limit additional price increases as a result of the changing Trade Policies, we must acknowledge the continued uncertainty around both reciprocal tariffs as well as new tariff orders on copper products. Viega is committed to the highest quality and strongest customer service and will make every effort to keep you informed of additional pricing modifications as we move forward. Thank you again for your continued support.

ProPress® stainless steel	12.5%
MegaPress®	12.5%
